

Governor's Alcohol Task Force

Licensing Committee

Committee Goal:

Streamline and modernize Kentucky's alcohol licensing structure in a manner that will remain revenue neutral or increase revenues while preserving existing licensee's privileges.

Objectives:

1. Evaluate the need of existing licensing types and criteria for licensing and develop tangible recommendations to create a series of general license types that would consolidate and reduce the number of licenses;
2. Identify & create recommendations to correct current statutory problems within the licensing structure;
3. Identify & create recommendations to correct inconsistencies within the licensing structure;
4. Update the existing fee schedule;
5. Simplify Licensing Process.

Guiding principle is to modernize and streamline without negatively impacting state revenues or licensee's privileges. We are not to create new unauthorized license privileges.
